

Available in "handle arm" or "scoop arm" version to accommodate a wide range of mirror options.

Windshield Mounted Pivoting MIRROR BRACKET

The Protomet Edge of Innovation

- Patent pending design provides clear view above windshield looking forward to aft
- Clam shell design accommodates multiple window trim sizes

- Pivot system provides the ability to stow the mirror without removing the bracket
- Folds while bracket stays securely mounted to windshield
- Custom rubber insert protects windshield trim

- Narrow mirror arm provides maximum range for adjusting port to starboard position
- No drilling required for installation
